

10 reasons to choose FirstOne Tuning Tyrewarmers

- 1) Special external material treated with teflon, proof to any liquid.
- 2) Closed with velcro. Without the usual strings which always get stuck.
- 3) Nomex in the internal side, fire and water proof, resists more than 6 years.
- 4) Without thermostat. The firsts in the world!

5) Heating cable inside with a particular arrangement: the heating time is shorter and the temperature is more uniform.

6) Teflon heating cable (instead of the usual silicone).

7) Silicone power cable (not PVC). It can resist up to 200°C, to fuel, oil and all the aggressive liquids.

8) Supplied with 110/240 Volt adapter and bag. Also available the precision digital thermometer with K probe for tyre deep measuring.

9) Easy to utilise and to install.

10) Made in Italy by Capit Performance, company leader in tyrewarmers manufacturing. 2 years warranty.
